**Preparation**

Inspecting the appliance:
- Close the inner and outer filter, put them back together.
- Rinse both parts under running water and dry thoroughly.

**Drying**

Selecting and adjusting the programme:
- Press the Start / Stop button until the required level is reached.
- Press the required programme.
- Press Off to stop the display.

Cleaning the fluff filter:
- The fluff filter consists of two parts. Clean the inner and outer filter, put them back together.
- Rinse regularly under running water and dry thoroughly.

Connecting the appliances:
- The drying operation can be interrupted briefly to add or remove laundry. However, it must then be restarted. The automatic programmes must be interrupted, otherwise there is a risk of burnout. The drying of starched laundry should be limited.

Environmental protection/energy-saving tips:
- Low heat
- Risk of creasing. Allow laundry to finish drying in the air.
- Do not pull out/empty the condensate container when drying is in progress.
- Do not let children make the cleaning and maintenance work.
- Do not over-dry easy-care laundry.
- Do not cover or seal the air inlet.
- Avoid pulling out/emptying the condensate container when drying is in progress.

**Important Information**

- The drying of starched laundry should be limited.
- Do not over-dry easy-care laundry.
- Risk of creasing. Allow laundry to finish drying in the air.
- Do not pull out/empty the condensate container when drying is in progress.

**Safety instructions**

- Always be set to the nearest full hour.

**End of programme**

- End of programme after 1-24 hours (button may need to be pressed several times).
- The drying operation can be interrupted briefly to add or remove laundry. However, it must then be restarted. The automatic programmes must be interrupted, otherwise there is a risk of burnout. The drying of starched laundry should be limited.

**Environmental protection/energy-saving tips**

- Low heat
- Risk of creasing. Allow laundry to finish drying in the air.
- Do not pull out/empty the condensate container when drying is in progress.
- Do not let children make the cleaning and maintenance work.
- Do not over-dry easy-care laundry.
- Do not cover or seal the air inlet.
- Avoid pulling out/emptying the condensate container when drying is in progress.

**Notes on laundry**

- Only use the dryer with the fluff filter intact.
- Check for cigarette lighters.
- Remove all items from pockets.
- See also separate instructions for "basket for woollens".
- Do not tumble-dry the following fabrics, for example:
  - Cotton
  - Linen
  - Other textile types
- Do not tumble-dry the following fabrics, for example:
  - Cotton
  - Linen
  - Other textile types

**Programme overview**

- Cupboard Dry
- Cupboard Dry Extra
- Cotton
- Linen
- Other textile types

**Fine adjustment of the drying result**

- The drying result can be adjusted according to the textile type.
- The degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.

**Environmental protection/energy-saving tips**

- Low heat
- Risk of creasing. Allow laundry to finish drying in the air.
- Do not pull out/empty the condensate container when drying is in progress.
- Do not let children make the cleaning and maintenance work.
- Do not over-dry easy-care laundry.
- Do not cover or seal the air inlet.
2. Select any programme using the programme selector.

1. Empty the condensate container

Mains connection

– Do not obstruct the air inlet on the front of the dryer.

– If in doubt, have the appliance connected by a specialist.

– Keep the area around the dryer clean.

– Transport the dryer in a vertical upright position.

– The connected load and necessary fuse protection are specified on the rating plate.

– The compressor in the dryer may occasion-ally make a whirring sound from time to time, which creates a whirring noise.

– Do not lean or sit on the door as this may obstruct the dryer door or prevent it from closing properly.

– All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.

– The tumble dryer is not to be used if industrial chemicals have been used for cleaning solvent, etc.)

– Dust (e.g. coal dust, flour) poses a danger: Do not use the dryer to dry fabrics.

– Do not use multiple plugs/connectors and/or extension cables.

– Keep pets away from the dryer.

– The dryer must not be used by children or persons who have not been instructed in its use.

– The water from condensation is not drinking water and may be contaminated.

– The defective mains cable replaced by the after-sales service.

– The dryer must not be used in humid and damp environments.

– Do not use the dryer for purposes other than those described above.

– Do not put laundry containing foamed material/rubber in the dryer

– Do not dry raw wool (including wool from sheepskin).

– Do not dry articles made of leather, wood, silk or asbestos material.

– Do not dry rayon fabric, nylons, rubber, or cutting edges.

– Do not dry laundry containing materials that could melt, melt or otherwise damage.

– Do not dry items containing metallic or plastic elements.

– Do not dry fabric impressions or textiles that have been pressing in the past.

– Do not dry items that are damaged.

– Do not dry items containing food residues.

– Do not dry的文章中包含大量数据和图表，可能需要进行手动调整以使其易于阅读。
Your new dryer

Congratulations - you have chosen to buy a modern, high-quality Siemens domestic appliance.

The condensation dryer with heat exchanger and automatic cleaning function is outstanding in terms of efficient energy consumption and low maintenance requirements → page 6.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.

Should you have any questions, our after-sales service will be pleased to help.

Environmentally-responsible disposal

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.siemens-home.com

![Intended use](image)

**Intended use**

- For domestic use only.
- Only to be used for drying fabrics that have been washed with water.

Keep children younger than 3 years old away from the dryer.

Do not let children make the cleaning and maintenance work on the dryer without supervision. Do not leave children unsupervised near the dryer.

Keep pets away from the dryer.

The dryer can be operated by children 8 years old and older, by persons with reduced physical, sensory or mental abilities and by persons with insufficient experience or knowledge if they are supervised or have been instructed in its use by a responsible adult.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

![Preparation](image)

**Preparation** Installation → page 8

- Never start the dryer if it is damaged. Inform your after-sales service.
- Make sure your hands are dry. Hold the plug only.

![Sorting and loading](image)

**Sorting and loading**

Remove all items from pockets. Check for cigarette lighters. The drum must be empty prior to loading.

See programme overview on page 7. See also separate instructions for “basket for woollens” (depending on the model)

![Selecting and adjusting the programme](image)

**Selecting and adjusting the programme**

Select the drying result → page 6

... and adapt to individual requirements

End of programme after 1-24 hours (button may need to be pressed several times) can always be set to the nearest full hour.

- **Low heat** Reduced temperature for delicate fabrics (e.g. drying time; e.g. polyacrylics, polyamide, elastics)
- **Less Ironing** Reduces creasing and prolongs the ‘reduced ironing’ phase after the programme has finished
- **Buzzer** Select On/Off for buzzer at the end of the programme.

![Programme selector](image)

**Programme selector**

- Easy-Care
- Cupboard Dry Extra
- Cupboard Dry
- Iron Dry
- Rapid 40
- Mixed Fabrics
- Woolens Finish

- AntiCreaseEnd
- Cupboard Dry
- Iron Dry
- Drying
- Mixed Fabrics

- Buzzer

**Additional functions**

- Clean filter
- Empty water

- Low heat
- Less Ironing
- Buzzer

- Automatic cleaning of the heat exchanger

- The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cotton, Easy-Care, Mixed Fabrics and Rapid 40 programmes → presetting = 0. After one of these programmes has been finely adjusted, the setting is retained for the others.

Further information → page 6.

**Page 6**

- Rinse the fluff filters under running water → page 4.
- Clean the filter in the condensate container if necessary → page 9.
- Empty the condensate container.
- End of programme after 1-24 hours (button may need to be pressed several times) can always be set to the nearest full hour.

**Page 4**

- Press the Star inserted.
- Only use the dryer with the fluff filter inserted.
- All buttons are sensitive and need to be touched lightly.

**Page 2**

- Inform your after-sales service.
- Never start the dryer if it is damaged. Inform your after-sales service.
- Make sure your hands are dry. Hold the plug only.
Respecting the dryer

Connecting the mains plug

Loading laundry

Sorting and loading laundry

See also separate instructions for “basket for woollens”

Selecting and adjusting the programme

Drying programme ...

Individual requirements

The drying programme ...

Drying

Do not pull out/empty the condensate container when drying is in progress.

1. Open the door. The drying process is interrupted.
2. Add or remove laundry then close the door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button. The remaining time is updated after a few minutes.

Interrupt programme

Adding or removing laundry.

The drying operation can be interrupted briefly to add or remove laundry. However, it must then be continued until it has finished.

1. Open the door. The drying process is interrupted.
2. Add or remove laundry then close the door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button. The remaining time is updated after a few minutes.

End of programme

as soon as AntiCrease/End indicator lamp lights up.

Emptying condensation

Empty the container after each drying cycle, not during drying.
1. Remove the condensate container and hold it level.
2. Pour out the condensation.
3. Always push container in fully until it clicks into place.
If the Empty water indicator lamp flashes despite the container having been emptied → Filter in condensate container, page 9.

Cleaning the fluff filter

Clean fluff filters reduce energy consumption.

The fluff filter consists of two parts. Clean the inner and outer filter after every drying cycle:
1. Open the door. Remove fluff from the door/door area.
2. Pull out both parts of the fluff filter.
3. Remove fluff from the edge of the shaft. Fluff should not fall into the open shaft.
4. Open the filter and remove all the fluff.
5. Rinse both parts under running water and dry thoroughly.
6. Close the inner and outer filter, put them back together and reinsert them into the appliance.

Switching off the dryer

Turn the programme selector to Off. Do not leave laundry in the dryer.

Removing the laundry

Your dryer is equipped with an automatic reduced ironing function. The drum is moved at specific time intervals for 60 minutes once the programme has ended. The laundry stays loose and fluffy (or 120 minutes if the additional Less Ironing function is selected).

Do not pull out/empty the condensate container when drying is in progress.
Information on laundry ...

Labelling of fabrics

Follow the manufacturer's care information.
- Dry at normal temperature.
- Dry at low temperature → in addition, select Low heat.
- Do not machine dry.

Always observe the safety instructions on page 13.
Do not tumble-dry the following fabrics, for example:
- Non-breathable fabrics (e.g. rubber-coated).
- Delicate materials (silk, curtains made from synthetic material) → these may crease.
- Oil-stained laundry.

Drying tips

- To ensure an even result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. towels).
- Close zips, hooks and eyelets, and button up covers. Tie fabric belts, apron strings, etc. together.
- Do not over-dry easy-care laundry → Risk of creasing. Allow laundry to finish drying in the air.
- Do not dry woollens in the dryer. They may, however, be refreshed 
  → page 7
  Woollens Finish programme.
- Do not iron laundry immediately after drying; fold items up and leave for a while → residual moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → page 6.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. → Do not use the Cupboard Dry Extra programme.
- The drying of starched laundry should be limited. → Starch leaves behind a coating that impairs drying.
- When washing laundry that is to be tumble-dried afterwards, use the correct amount of fabric softener as specified in the manufacturer's instructions.
- For pre-dried, multi-layered fabrics or small, individual items of laundry, use the Timed programme. Also suitable for subsequent drying.

Environmental protection/energy-saving tips

- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed, the shorter the drying time will be, thus less energy is consumed. Also spin easy-care laundry.
- Use the maximum recommended capacity, but do not exceed it → Programme overview page 7.
- Make sure the room is well ventilated during drying.
- Do not cover or seal the air inlet.

Button signals

Setting the volume for button signals

Turn to Off 1 x to the right Press and hold Low heat and turn 2 x to the right Press Start/Stop until the required volume is reached Turn to Off

Selective values: 0 (off), 1 (quiet), 2 (medium), 3 (loud), 4 (very loud).

Fine adjustment of the drying result

Adjustment of the levels of dryness

Turn to Off 1 x to the right Press and hold Low heat and turn 5 x to the right Press Low heat until the required level is reached Turn to Off

L:00, L:01, L:02, L:03 are shown in sequence
Short signal when changing from L:03 to L:00, otherwise long signal.

Important Information

Your dryer is designed to be particularly energy efficient. Its technical features include a refrigeration circuit, which uses energy efficiently in a similar way to a refrigerator.

The dryer's heat exchanger is cleaned automatically during drying.
The fluff filters and filter in the condensate container must be cleaned regularly.

Never operate the dryer without the fluff filters and without filter in condensate container.

- Fluff filters
  During drying, fluff and hair from the laundry is trapped by the fluff filter. Blocked fluff filters may impair the heat exchange process.
The fluff filters must therefore be cleaned after every drying cycle. Rinse regularly under running water → page 4.

- Filter in the condensate container
  The filter in the condensate container cleans the condensation. This condensation is required for the automatic cleaning process. The filter should be cleaned regularly under running water. Empty the condensate container before cleaning the filter → page 4/9.

- Fabrics
  Do not dry any fabrics that have come into contact with solvents, oil, wax, grease or paint: e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent. etc.
  Empty all pockets.
  Do not dry non-breathable fabrics.
  Avoid drying items that produce a lot of fluff.
  Woollens should be refreshed only, using the woollens programme.
Programme overview  also see Page 5

Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

After drying...

</tr>
<tr>
<td>Rapid 40</td>
<td>max. 1 kg Laundry made of synthetic fibres, cotton or blended fabrics (for example) that needs to be dried quickly. The values may differ from the those specified depending on the type of fabric, mixture of laundry to be dried, residual moisture in the fabric and loading capacity.</td>
</tr>
<tr>
<td>Outdoor</td>
<td>max. 1.5 kg Fabrics with membrane coating, water-repellent fabrics, functional clothing, fleece fabrics (dry jackets/trousers with removable internal lining separately).</td>
</tr>
<tr>
<td>Programme timewarm 30</td>
<td>max. 3 kg All types of fabric; time programme. Suitable for pre-dried or slightly damp laundry and for drying off multi-layered, thick laundry. Only dry wool, sports shoes and soft toys with the basket for woolens — Optional Accessories, page 10. In the time programme, the laundry’s residual moisture is not automatically detected. If the laundry is still too damp after the drying programme, repeat the programme.</td>
</tr>
</tbody>
</table>

*for Cotton and Easy-Care programmes only
**Dryness levels can be selected individually — Cupboard Dry Extra, Cupboard Dry and Iron Dry (depending on the model).

Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.
Installation

- Scope of delivery: dryer, installation and operating instructions, woollens basket (depending on model).
- Check dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by a specialist.
- Do not lift the dryer by protruding parts (e.g. the door) - risk of breakage.

Setting up the dryer

- The appliance plug must always be accessible.
- Ensure that the appliance is installed on a clean, level and firm surface.
- Do not obstruct the air inlet on the front of the dryer.
- Keep the area around the dryer clean.
- Make the dryer level using the threaded feet and a spirit level.
- Do not remove the threaded feet under any circumstances.

Do not set up the dryer behind a door or sliding door, as this may obstruct the dryer door or prevent it from opening. This will prevent a potentially fatal danger to children from locking themselves in.

Mains connection see Safety instructions → page 13.

- Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.
- The mains voltage and the voltage shown on the rating plate (→ page 10) must be the same.
- The connected load and necessary fuse protection are specified on the rating plate.

Frost protection

- Empty the condensate container → page 4.
- Select any programme using the programme selector.
- Press the Start/Stop button → condensed water is pumped into the container.
- Wait 5 minutes and then empty the condensate container again.
- Turn the programme selector to Off.

Transport

- Prepare the dryer → see Frost protection.
- Transport the dryer in a vertical upright position.
- Following transportation, do not use the dryer for two hours.

The dryer contains residual water; this can flow out if the dryer is tilted.

Care and cleaning

Heat exchanger
The dryer’s heat exchanger is cleaned automatically during drying. Cin appears in the display panel. Do not pull out the condensate container during the cleaning process.

Dryer housing, control panel, air intake
Wipe with a soft, damp cloth.
Do not use harsh cleaning agents or solvents.
Remove detergent and cleaning agent residue immediately.
Some water may collect between the window and the seal during drying. This does not affect the proper operation of your dryer in any way.

Filter in the condensate container
The filter is cleaned automatically when the condensate container is emptied.
However, the filter should still be cleaned regularly under running water → This prevents stubborn deposits/dirt from building up.

1. Pull out the condensate container.
2. Pull the filter out of its snap-in lock.
3. Clean the filter under running water or in the dishwasher.
4. Refit the filter.
5. Insert the condensate container so that it locks into place.

Moisture sensor
The dryer is equipped with stainless steel moisture sensors. Moisture sensors measure how damp the laundry is. A thin layer of limescale may build up on the moisture sensors after prolonged use.

1. Open the door.
2. Clean the moisture sensors using a damp sponge with a rough surface.

Only operate the dryer with the filter inserted.

Appliance must be switched off.

Do not use steel wool or abrasive materials.
Technical Data

- Dimensions (DxWxH): 60 x 60 x 85 cm (height adjustable)
- Weight: approx. 51 kg
- Max. capacity: 7 kg
- Condensate container: 4.0 l
- Connection voltage: 220-240 V
- Connected load: max. 800 W
- Fuse protection: 10 A
- Ambient temperature: 5 - 35°C
- Product number: Inside of door
- Production number: The rating plate can be found on the back of the dryer.
- Power consumption when switched off: 0.10 W
- Power consumption when ready for use (left-on mode): 1.00 W
- Drum interior light (depending on model): The drum lights up after the door is opened and after the programme starts, and switches off automatically.

Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU.

Optional accessories (order from the after-sales service using the order number, depending on the model)

- WZ 11410: Washer-dryer stack connection set
- WZ 20290: Installation underneath the worktop
- WZ 20500: Platform
- WZ 20600: Wollens basket

Normal noises

During drying, the compressor and the pump generate some noise which is entirely normal.

- The compressor in the dryer may occasionally generate a humming noise. The volume and pitch of this may vary depending on the selected programmes and the progress of the drying.
- The compressor in the dryer is ventilated from time to time, which creates a whirring sound.
- The automatic cleaning process causes a clicking noise.
- The process of pumping the condensation into the condensate container generates pumping noises.
What to do if...

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. The expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:– GB 0344 892 8993 (Calls charged at local or mobile rate)– IE 01450 2655 (0,03 € per minute at peak. Off peak 0,0088 € per minute.)When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (PD) (see under the loading door).Turn the programme selector to Off and unplug the mains plug from the socket.

- The Start/Stop indicator lamp does not light up.

- The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.

- The Empty water indicator lamp and the Start/Stop button are flashing.

- The Clean filter indicator lamp and Start/Stop button are flashing.

- Cin appears in the display panel.

- Dryer does not start.

- Water is leaking out.

- The door opens by itself.

- Creasing.

- Laundry is not dried correctly or is still too damp.

- Drying time too long.

- The humidity in the room increases significantly.

- Power failure.

- Other intermittent noises and vibrations.

- Loud humming noise for several seconds.

- The Start/Stop indicator lamp does not light up.

- The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.

- The Empty water indicator lamp and the Start/Stop button are flashing.

- The Clean filter indicator lamp and Start/Stop button are flashing.

- Cin appears in the display panel.

- Dryer does not start.

- Water is leaking out.

- The door opens by itself.

- Creasing.

- Laundry is not dried correctly or is still too damp.

- Drying time too long.

- The humidity in the room increases significantly.

- Power failure.

- Other intermittent noises and vibrations.

- Loud humming noise for several seconds.

- Energy-saving mode is activated → see the separate Energy-saving mode instructions.

- Dryer transorted? → Wait 2 hours and start again.

- Rinse the fluff filter under running water → page 4.

- Not an error. Automatic cleaning of the heat exchanger. Do not empty the condensate container.

- Door closed?

- Ambient temperature greater than 5°C? The optimum ambient temperature for drying is between 5 °C and 35 °C.

- If you have exceeded the maximum load for the programme, the final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure the items are left at a temperature that ensures that the items will not be damaged.

- Do not use the dryer on.

- Do not load the drum with laundry. Check the contents before you switch the dryer on.

- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.) → Risk of fire/explosion.

- Do not use multiple plugs/connectors and/or extension cables.

- Do not touch or hold the appliance plug with wet hands → Risk of electric shock.

- Dust (e.g. coal dust, flour) poses a danger: Do not use the dryer → Risk of explosion

- Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer be damaged due to possible deformation of the foamed material.

- Do not turn off the dryer before the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.

- Do not damage the mains lead → Risk of electric shock.

- Risk of fire/explosion.

- Risk of explosion.

- Risk of injury.

- Risk of suffocation.

Safety instructions

- Pull the appliance plug out of the socket immediately or disconnect the fuse.

- In rooms inside the house.

- To dry fabrics.

- To be used for purposes other than those described above.

- To be modified in terms of its technology or properties.

- Do not leave children unsupervised near the dryer.

- Keep pets away from the dryer.

- Do not touch or hold the appliance plug with wet hands → Risk of electric shock.

- Do not lean or sit on the door → Risk of tipping.

- Connect the dryer to an AC earthed socket according to specifications, otherwise it cannot be guaranteed that the appliance is completely safe.

- The cable cross-section must be sufficient.

- Only use earth-leakage circuit breakers with the following symbol: Risk of electric shock.

- The appliance plug and socket must be compatible.

- Do not use multiple plugs/connectors and/or extension cables.

- Never pull the appliance plug out of the socket by its cable.

- Only load the drum with laundry. Check the contents before you switch the dryer on.

- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.) → Risk of fire/explosion.

- The tumble dryer is not to be used if industrial chemicals have been used for cleaning.

- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.) → Risk of fire/explosion.

- Do not leave children unsupervised near the dryer.
